

Energy Block Grants Work!

CAMPAIGN TO SAVE EECBG

Outagamie County Regional Airport Goes Green

Outagamie County, Wisconsin is using its Energy Efficiency and Conservation Block Grant (EECBG) funding to enhance its capacity for renewable energy generation. By installing solar thermal and photovoltaic systems at its regional airport and improving methane gas recovery at the County-operated landfill, **Outagamie County is substantially reducing its reliance on natural gas and other fossil fuels.**

Outagamie County is using EECBG funding to ...

- **Deploy solar thermal panels** on the terminal roof of Outagamie County Regional Airport **and solar photovoltaic panels** on the concourse roof to reduce natural gas and electricity consumption at the facility.
- Expand one of the nation's first landfill gas-to-energy facilities by installing an additional heat recovery unit to capture waste heat from the existing cogeneration facility, thus **maximizing renewable energy production and utilization.**
- Complete energy saving retrofits and upgrades in County buildings, including **improvements in HVAC controls and lighting systems.**

Impact on Outagamie County, WI

- \$492,300 in EECBG funds
- 12 jobs to be created or retained
- More than 175,000 metric tons of CO₂e emissions prevented
- Natural gas use reduced by 20,000 therms/year

For more information about Outagamie County's EECBG activities, contact Gary Whipp at (920) 832-6360, or WhippGE@co.outagamie.wi.us.

Organized by Climate Communities, the Energy Block Grants Work! campaign is showcasing how cities and counties across America are using federal Energy Efficiency and Conservation Block Grant (EECBG) dollars to create jobs, save energy, and reduce carbon pollution.
